

OBJECTIVE OF PROJECT

The main objective of the project is to help the ongoing user help to attain an easy way to navigate the customer's details and solve the Customers problems. The Disadvantages of the cellular phone is that same of that with the other electronic gadgets. If damaged or gets faulty by any means then the entire system gets Hung up. The main objective is to provide an easy, manageable way to provide help to the customer. It is basically a very swift complaint processing System by which customer can again get the device back in the right condition. It's basically build in the platform of C#.NET windows application which makes the application quite flexible and easy to be operated. The manager of the Mobile store also finds it sufficient enough to view the details of the sales, servicing and well organized way to employ the staff that are included in the mobile store itself.

Thus it can be highlighted that the MOBILE SHOP MANAGEMENT SYSTEM is the self explanatory package of governing a well developed Mobile Store in such a way that nothing gets excluded or rather neglected from the project and everything is predominant over necessary requirements that meets the need of both Customer as well as User.

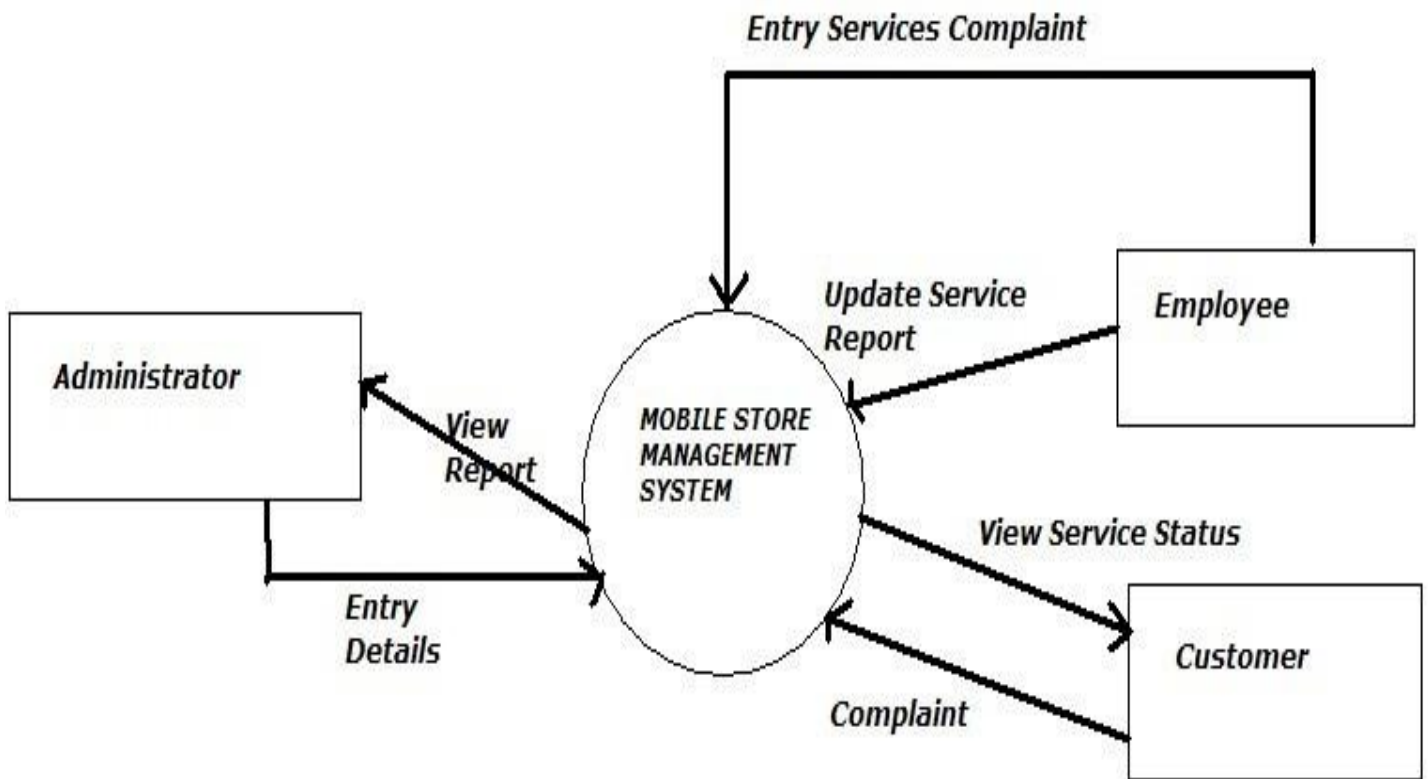

Hardware Requirements

- **Processor** : **Pentium-iv**
- **RAM** : **1GB**
- **Hard Disk** : **40 GB**
- **Printer** : **HP Laser Zet**
- **Monitor** : **LG Monitor**

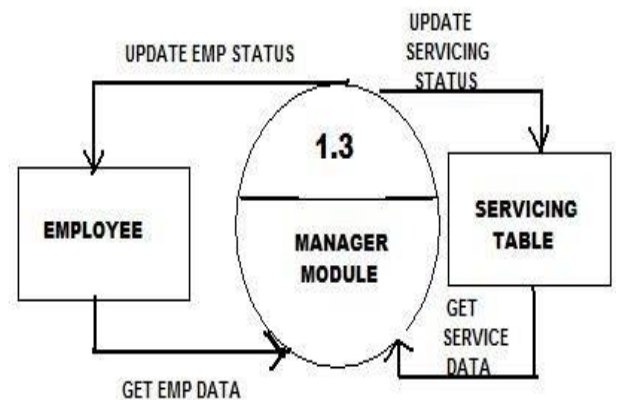

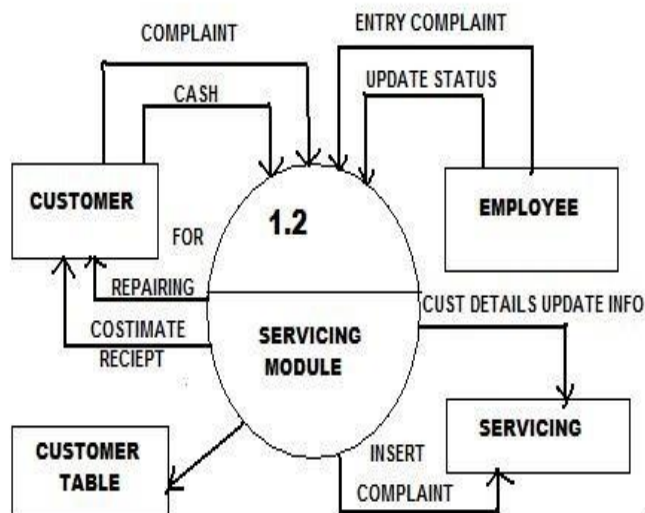

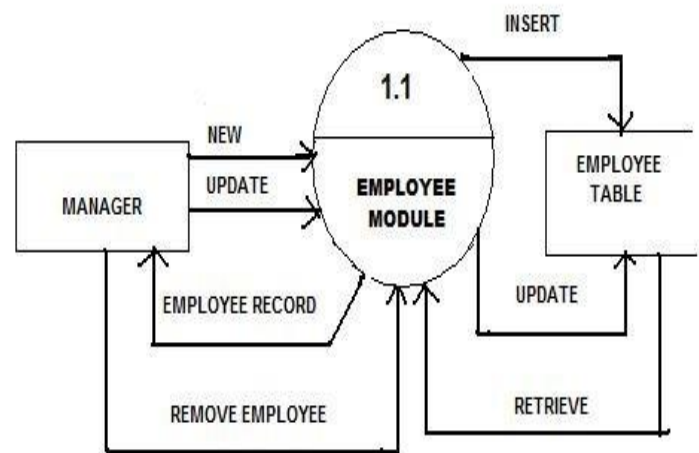

Software Requirements

- **Back end** : **MS excess**
- **Front End** : **Visual Basis**
- **Work Station O/s** : **Windows XP**
- **Tool** : **M. S. Office**

Conclusion

This software has been made keeping it in mind that software is made for end users, not for programmers. So user friendliness keeping eye candy was first in the list. Wish this Student Admission System will serve satisfactory for which it is made. Easiness of mastering the whole process – with the use of Microsoft® Visual Studio® 2005 Visual C#.NET® and Microsoft® SQL Server® 2005 the process of controlling the whole system would be much easier and those can keep full control on the overall process without facing much trouble. With the user friendly GUI the software is very much user friendly and would be easy to use for anybody with a meager computer knowledge.
